

# Boiler House

Designed by architect Henry Whittaker, this heritage art deco boiler plant adjacent to The Whittaker was originally a functional steam plant providing a reliable source of heat to all the buildings on the site. Dating back to the 1930's it features asymmetrical step-massed architecture, gothic-inspired quatrefoil insets, and narrow linear windows. A technical innovation of its time, the Boiler House will be a landmark amenity and is the inspiration for the character and ambience of The Whittaker.

MEZZANINE LEVEL 1,955 (approx)

MAIN FLOOR 4,445 (approx)
