

- Energy Star® Appliances: refrigerator, range, dishwasher, washer and dryer
- Low-E double glazed, thermally isolated, energy efficient aluminum window system, which provides warmth in the winter and cools in the summer
- Superior building envelope to minimize heat loss and gain

- A minimum of R17 insulation on exterior of the building and roof
- Low-E double glazed, thermally isolated, energy efficient aluminum window system, which provides warmth in the winter and cools in the summer
- Superior building envelope to minimize heat loss and gain
- External shading on south and west windows to minimize heat gain in summer but allow for daylight (on most suites)
- Energy Star® Appliances: refrigerator, range, dishwasher, washer and dryer
- High efficiency, zoned, occupancy-controlled lighting in parkade and common areas
- Enhanced “day-lighting” strategies to provide daylight in suites
