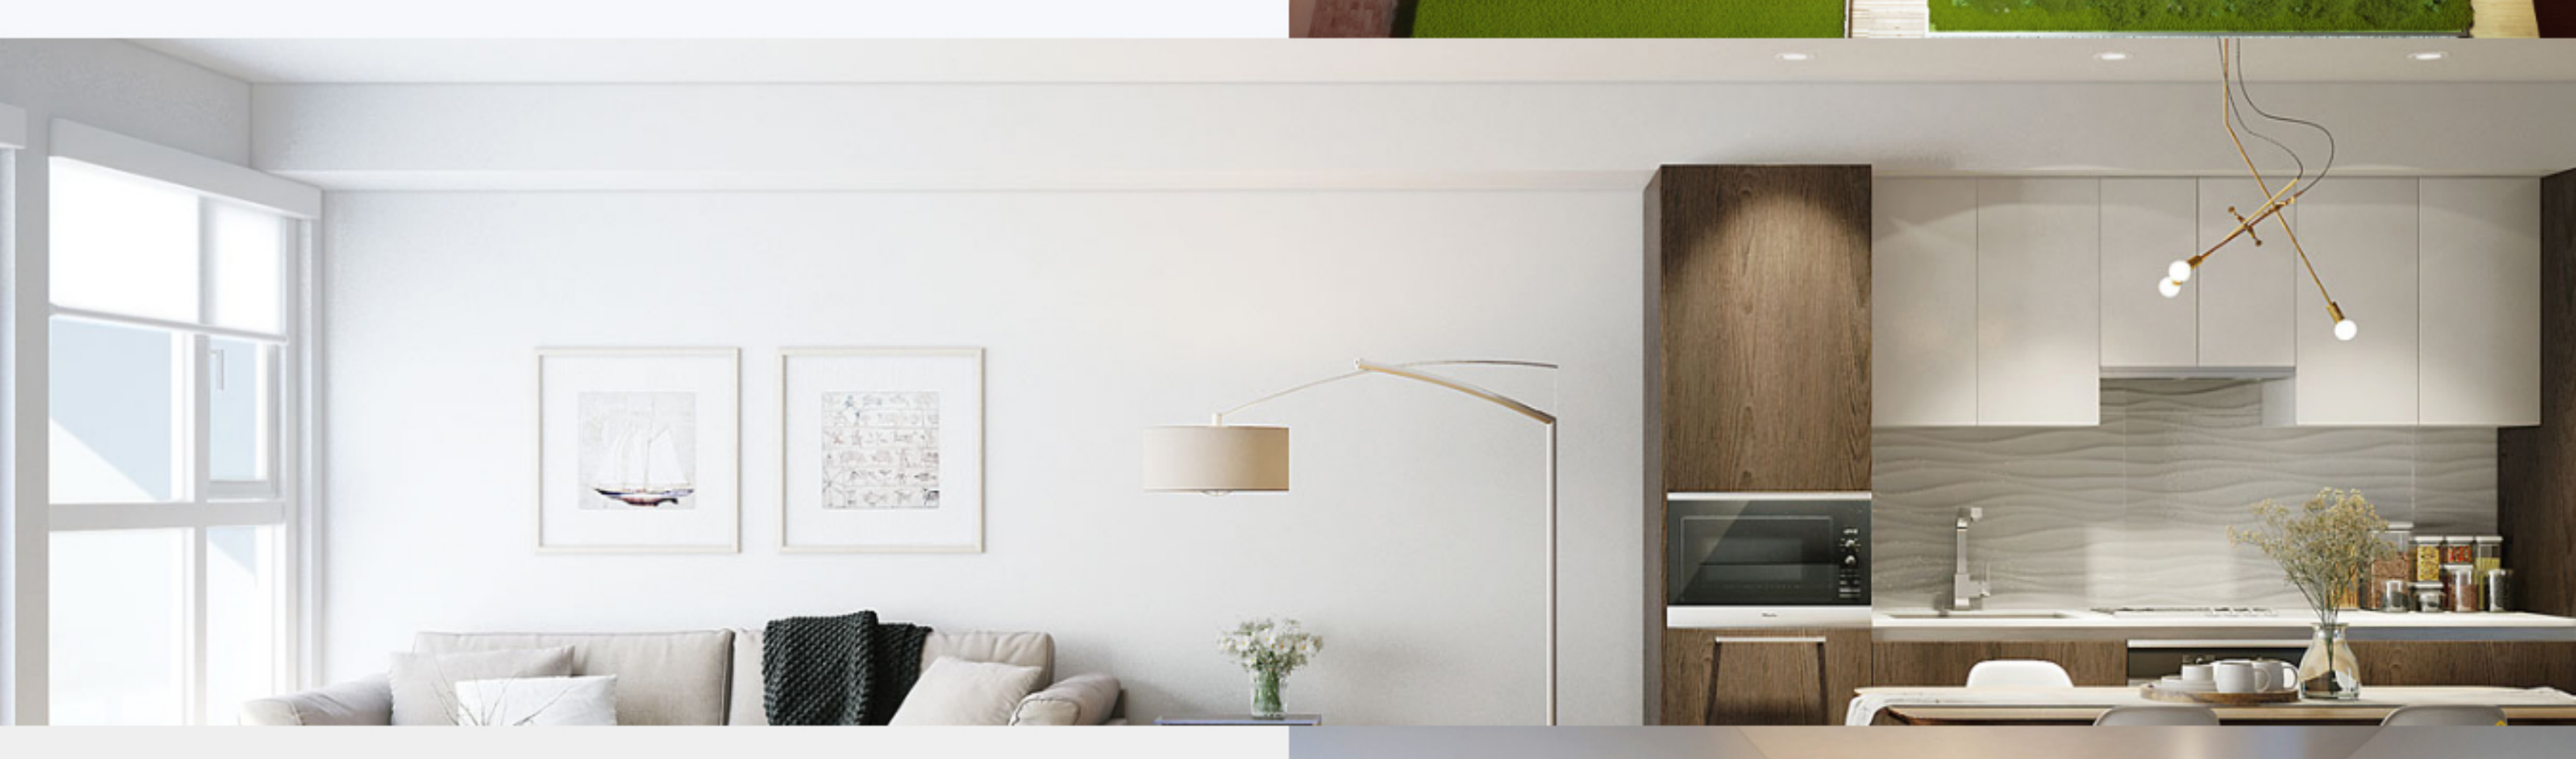
Building

This modern mixed-use building's contemporary exterior complements the scale and spirit of the neighbourhood. On the ground floor, street-front retail spaces face Main Street, while innovative loft residences face 20th and the rear of the building.

Windows are featured on two sides of most homes, providing airflow and natural light to all areas. The efficient floorplan layouts are thoughtfully designed for today's modern lifestyle. The building's contemporary exterior complements the scale and spirit of the neighbourhood. The architecture focuses on the seamless indoor-outdoor relationship that gives a layered experience of the home and creates warm and inviting spaces inside and out.

Common Area

The centre of the building features an open-air courtyard with greenspace, where residents can interact, and people can escape from the daily grind. The landscape design was created to be green, simple and friendly. The plants, trees and stone garden all serve to create a calm anchor for the building community to live around.



Residences

Every home is thoughtfully designed from top to bottom for today's busy lifestyles.

The efficient floorplans give residents the utmost in convenience, adaptability and room to grow. Spectacular kitchens will truly impress gourmet chefs and guests alike, featuring timeless Italian cabinetry, clean, flowing lines, and every modern convenience such as the high-end Miele appliance package. The master ensuite invites you to unwind in a spa-inspired ambiance, and engineered hardwood floors bring the whole design together into a welcoming, livable home.

Ground floor homes feature trendy loft-style living on split levels. Some of these homes have direct entry from the street, and some have a private yard in the back. All loft units feature efficient floorplans and living rooms with high ceilings.
