

BUILDING FEATURES

CONTEMPORARY DESIGN

Designed for modern life, refined with style. The five-story building comprised of 29 distinctive residences and a variety of outdoor spaces situated to maximize ocean, mountain, and city views. Inspired by West Coast novelty, the exterior achieves a modern, natural form with stone and cedar elements to complement refined geometrics. For additional privacy; structured terraces accompanied with organics provide depth and aesthetic to the surrounding walkway.

MODERN KITCHENS

Intelligently designed with elegance and functionality to encourage culinary creativity. High gloss white cabinetry is complemented by white quartz countertops and a long-tile glass backsplash. For a sophisticated look; Kraus stainless, under-mount sinks are accompanied with a high arc, single arm, faucet. Each residence features a selection of energy-efficient, stainless-steel appliances. Contrived for easement; gather around a seamless waterfall kitchen island, ensuring the capacity to entertain with class.

BUILT GREEN

As the homeowner of a house built green, you will enjoy a healthier, more durable home with a lower environmental impact. Specific benefits include; non-toxic material selection, improved ventilation, superior insulation, increased water conservation, and eminent build durability. Increased home efficiency means long-term cost savings on water consumption, heating and cooling. By conserving natural resources you leave more for future generations to enjoy.

CONVENIENCE & SECURITY

As a resident, appreciate grade level entry into the secured parkade where your means of transportation has its designated place. Alternatively, exit and enter through the main lobby which features a spacious and elevated design.

Adjoining commercial uses gives you immediate access to a variety of amenities along the plaza and a woodland outdoor amenity space on the east side property provides nature's habitat for birds and vegetation.
